## 4.0 SARRA GLOBAL PRODUCT

### 4.1 MySETS

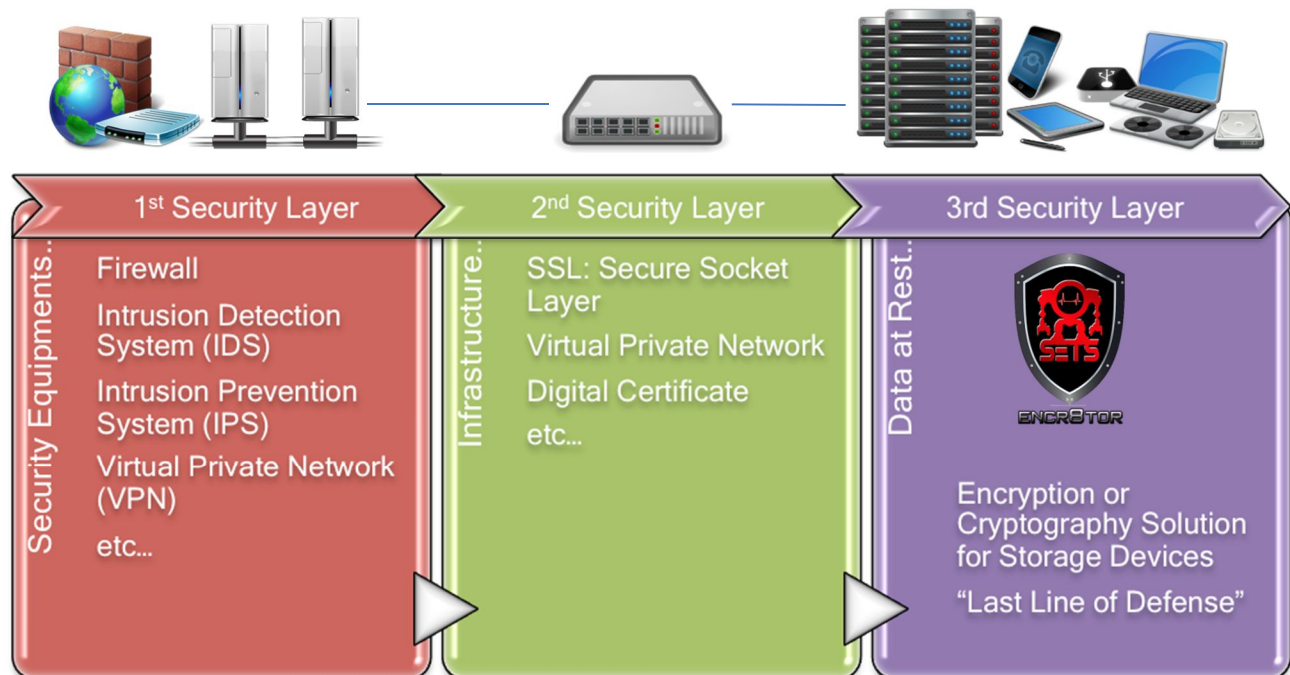

**MySETS** Xlayer is a data at end-point security solution positioned as the best “Last Line Of Defense” for all types of data security. This platform is able to adapt into any types of industry and environment. The technology platform is currently using 512-Bit encryption

algorithm (the highest AES encryption technology) with multi-secret key infrastructure (SKI). The cutting edge technology of MySETS Xlayer is the ability to perform Multi-Layer Encryption (which is currently the only solution in

the market) with multi-secret key infrastructure. The purpose of this functionality is to strengthen the “Last Line Of Defense” over the secured data/information.

As a product, MySETS Xlayer is suitable for enterprise roll out to protect data mainly at offsite locations such as branches, laptops/notebooks, external storage devices and cloud data's. Therefore, MySETS Xlayer can be strategically bundled with hard disk drives or external storage devices for the optimum data protection.

The vulnerability of data exists everywhere, most of corporations and defense department are securing themselves with a single layered 512-Bit AES Encryption and the U.S governments are the only one equipped with a single layered “Ketufile” AES Encryption to date.

The MySETS Xlayer has been certified with International Standard ISO/IEC 15408 by CyberSecurity Malaysia (CSM) and is being endorsed as one of the companies participating in the National CyberSecurity initiatives under “PEMANDU”.

## 4.2 SMART FARMING SOLUTION

Sensors of various types are connected to motes (nodes). Motes facilitate transmission of data to the Sensor Communications server. Not only do they act as transmitters but also as relays, and thereby enables wide coverage, making it possible to implement the system to large plantations. Placing the motes in cluster grid formation, resolves any odd shaped areas.

The basic Monitoring system is a client based application. By having a Monitoring Web server, the system can be accessed through the internet from a web browser. Administrators can manage the system remotely, receiving alert notifications through SMS (Short Message System) or email, and applying control modifications through the web.

## SMART FARMING SOLUTION

### 4.3 E-LEAVE SYSTEM

**E-Leave System** is an online system for employee leave application. Through this system an organization can manage employee leave systematically as all the data is keep and save in this application. Employee will be able to apply their leave at anytime and anywhere they wish. The status of their application will be instantly ready for them to view. This system will help to eliminate the paperwork issue and the respond time by management.

## E-LEAVE SYSTEM

#### 4.4 CUSTOMER SATISFACTION SURVEY SYSTEM

**Customer Satisfaction Survey System (CSSS)** is an end-to-end solution for tracking customer satisfaction. It measures of how services supplied by an organization meet or surpass customer expectation. It is seen as a key performance indicator within the organization itself. Measuring customer satisfaction provides an indication of how successful the organization is at providing services to the customers. This CSSS is an abstract concept and the actual manifestation of the state of satisfaction will vary from person to person and service to service. The state of satisfaction depends on a number of both psychological and physical variables which correlate with satisfaction behaviors such as return and recommend rate. The level of satisfaction can also vary depending on other factors the customer, such as other services against which the customer can compare the organization's services.

Matter-of-fact, the CSSS is recognized as efficient online provider of customer satisfaction surveying solutions that focus on measuring customer perceptions of how well the organizations delivers it services that include factors like service promptness, staff responsiveness, and understanding of the customer's problem thus can provide the tools to improve organizational overall performance.

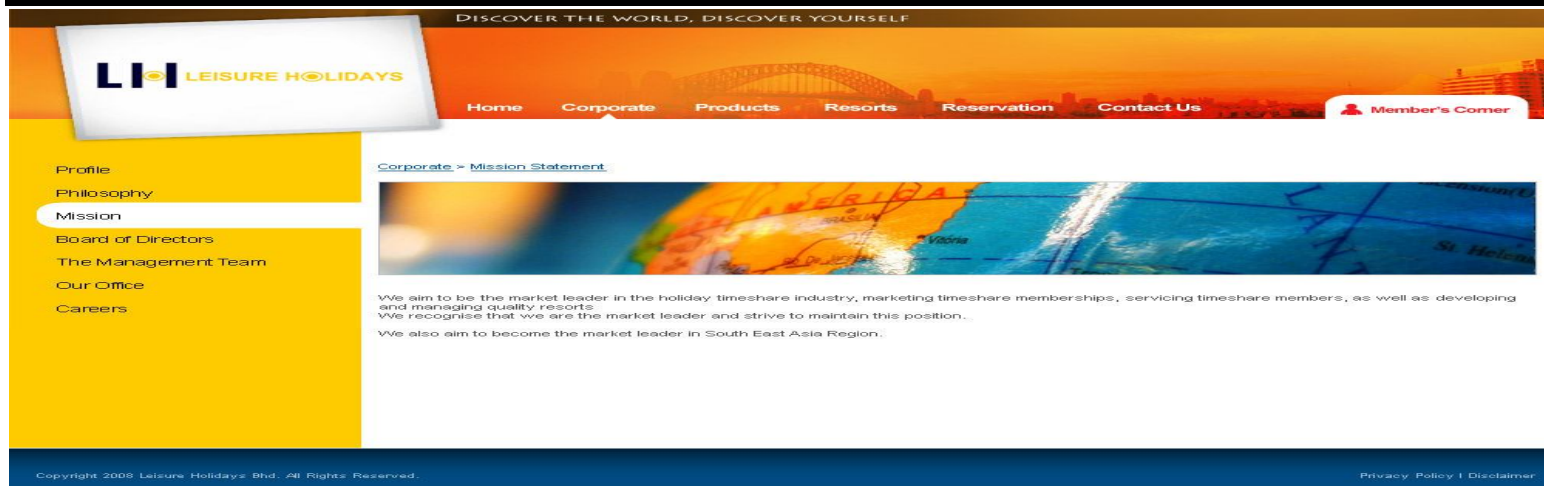

## 4.5 LOYALTY MANAGEMENT SYSTEM

**Loyalty Management System (LMS)** is a redemption system where Members can redeem Products offered by Clients (Program Owner) based on Points that the Members gathered from using the Cards at specific Merchants outlets. In other words, the more the Member purchase at the Merchants, the more loyalty points will be received by Member. These accumulated points can then be redeemed for Products accordingly.

A Client (Program Owner) is an owner of a Program. An example of a Client: Berjaya Hotel. A Program is a promotional method to pull customers (Members) to purchase at Merchants locations Example: 'Free Room Nights at Prestigious Berjaya Hotels in Asia'. Card holders can redeem when points reach 10,000 points.

A Member is a person who is holding the Loyalty Card. When purchasing at Merchants outlets, the Member uses the Loyalty Card and gain Points. A Product could be anything.

## 8.0 PROFESSIONAL CONSULTANT SERVICES

### WE DO WHAT WE DO BEST

#### 1 TRAINING & FACILITATION

Our approach in classroom learning is beyond training, we facilitate! Simply means we stimulate team discussion through collaboration until participants accomplish their objectives.

#### 2 ORGANIZATIONAL ANALYSIS

The need for expert diagnosis is paramount. We have the expertise to review the development, environment, personnel and operation of an organization and offer recommendation for improvement.

#### 3 CULTURE & VALUE BUILDING

Culture and Value will determine the characteristic of the organization. We will be able to assist organizations with specific ideas, structures and processes which can influence the day to day operations.

#### 4 COACHING & MENTORING

Organizations will improve their leadership development ROI when coaching links directly to the strategy and performance. The extensive coaching experience coupled with multiple coaching techniques will definitely help organizations in building the coaching relationships opportunities.

#### 5 MONITORING & MEASUREMENT

The most critical part of a learning intervention is to measure the impact of learning especially back at the workplace. We are among the very few who can deliver these services through learning application agreement, action learning, statistical measures and several other mechanism.

#### 6 CURRICULUM DEVELOPMENT

Every organizations will need a customized development curriculum that fits different level of people in the organization. We have the knowledge, experience and the skill to create a planned curriculum, andragogy, instruction, and presentation modes that will suit the audience.

#### 7 TEAMBUILDING

Our teambuilding program is more than just hats and t-shirts. It is not limited to only outdoor games and activities but the interventions were self stimulating and challenged team player credibility.
